## **Testimonials**

*Rebecca Dilla, Carnegie Mellon University*

*As a student studying for my master's degree in Information Systems Management, my academic program focuses on building both business and technical skills. In my internship search, I was looking for project that also focused on both. At Infosys, I work with the Performance Testing division to help them build a strategy for testing Internet of Things (IoT) applications. Researching the trends and capabilities of this new technology has been interesting, and made me interested in working with IoT applications as a full time career.*

*The best part about an internship at Infosys is the truly global experience it provides. Every weekend I head off with some of my fellow interns to explore some new part of India. However, with interns from every corner of the globe, I think I've learned just as much about the rest of the world as I have about India! This is truly the most international group of individuals I've ever had the opportunity to be a part of, and they have made this experience so positive.*

*Jake Morrissey, Harvard University*

*If you are in the process of searching for a summer internship, look no further than the InStep program at Infosys. I joined the Infosys team during the summer following my sophomore year at Harvard, and it was one of the best decisions of my life. The InStep program offers a unique balance of genuine work experience and unforgettable leisure opportunities. During my internship, I worked with the Center for Emerging Technologies to assess the viability of block chain technology for trade finance. The project was both interesting and impactful, yet still very manageable. While I worked during the week, I traveled on the weekends, having the chance to explore diverse locations ranging from mountain ranges to city markets. The best part of InStep, though, are the fellow interns who join you in the workplace and on vacations. When you work at Infosys, you are introduced to many other students from the best universities around the world, making friendships that will last a lifetime. I would highly recommend the InStep experience, and encourage you to seriously consider this unique internship experience.*

Thanks and look forward to seeing you in India,

Toai Chowdhury (toai.chowdhury@infosys.com)
